Dear Dr, Prusti,

Thank you very much for your kind response

I didn't receive the automatic confirmation email after I intended to send it. Instead of that, a failure's notification, I suppose because the extension of the resume asked in the form. Moreover I could notice that only one attached is allowed in this form.

I was thinking to submit two forms (one for each experiment) with a more reduced explanation for them, but according to your response, it seems that Letters of Interest is not the adequate place to do my proposal that, effectively, is for two scientific experiments, the first with the Gaia data, and the second, with an eventual future mission.

So I would appreciate very much your advice for the adequate way to offer to ESA this projects.

I must inform you that at the same time I sent to you my email, I did the same to the Advanced Concept Team, not having so far any response.

Apologising my disturbance and thanking your gentleness, I remind

Yours sincerely

Juan J. Schulz

To: Juan Joaquín Schulz Poquet <jjschulzpoquet@gmail.com>

Dear Mr. Schulz Poquet,

If your submission through the official form has gone correctly, then you should have received an automatic confirmation Email back to you. In any case your proposal seem to me rather like a proposal for a scientific experiment with the Gaia data than a contribution to archive access activities which we are seeking at this moment. Nevertheless, I can ensure proper evaluation of your Letter of Interest as long as you have formally submitted your contribution through the Call web-pages.

Yours sincerely,

Timo Prusti

Dear Dr. Prusti,

I sent the following text to "Letters of Interest" using the official form. In doubts of having prepared it correctly, I'm sending it hereby directly to you also.

Dear Sirs,
