

Dear Prof. Schulz Poquet,

We have received your manuscript entitled, "An Astronomical Test for the Second Postulate of Special Relativity Theory," which we have assigned the manuscript # 17616. This number should be used in all correspondence.

Please do not send any revisions before receiving further correspondence from us. Revisions sent in the middle of the review process will delay the review process.

Thank you for your submission to AJP.

Sincerely yours,

Dear Sirs,

Please find attached a manuscript which I'd like very much to see published in the Journal, considering its power of diffusion, how prestigious it is and the fact that I felt encouraged to write it after reading Prof. J.G. Fox's works published on it.

But I'm doubtful whether my pretended article meets your editorial policies, so that I'm sending it in advance, before the formal submission, seeking a fast response in that sense.

I'm an Argentinian engineer, owning a manufacturing enterprise as way of living, and a very fond free-lance researcher of the Relativity issues.

Thank you very much for your attention.

With my best regards,

Juan J. Schulz Poquet.
